With over 17 years of experience, I have spearheaded the development of cloud-native applications and cloud migrations, integrated countless proprietary and 3rd-party REST and GraphQL APIs, and improved various systems' resilience through quicker detection and recovery. As a backend-leaning full-stack developer, I'm most proficient in API development, domain design, and infrastructure automation.

WORK EXPERIENCE

New Relic

09/2021 - 11/2024

Lead Software Engineer

- Designed and implemented an AWS-based deployment platform that modernized Docker deployer infrastructure, enabling seamless E2E and regression testing across development teams
- Drove the successful adoption of a new deployment platform, enhancing team efficiency and fostering a culture of continuous improvement across engineering teams.
- Individual contributor on greenfield workflow product leveraging Temporal.io's distributed systems architecture

Senior Software Engineer

- Reduced MTTD/MTTR by 40% within 3 months by implementing an intelligent alerting system with New Relic Synthetics and AWS Lambda, enhancing customer onboarding efficiency.
- Implemented a zero-configuration Java Agent installation within 4 months, enhancing customer experience by enabling seamless dynamic re-attachment to application servers.
- Drove Growth Engineering initiatives including newrelic-cli development, Infrastructure-as-Code solutions (Puppet modules), and UI-to-YAML migration for onboarding framework

Carfax

07/2017 - 09/2021

Senior Software Engineer

- Built SMS alerting microservice from ground up, processing dealer notifications for buyer leads with 99.9% uptime serving 10K+ dealers
- Architected cloud-native Dealer Account Management application using TypeScript/ Node.js frontend with Serverless Framework backend, reducing infrastructure costs by 30%

SKILLS

Languages: Java, Go, TypeScript, Groovy, Python, JavaScript

Frameworks & Libraries: Spring, Node.js, React, Temporal.io

Cloud & DevOps: AWS, Terraform, CDK, Docker, Kubernetes

Databases: MySQL, Postgres, Oracle, MongoDB, DynamoDB

Tools & Platforms: Jenkins, Puppet, New Relic, Git, Ansible

EDUCATION

Bachelor of Science, Computer Science

Saint Louis University
01/2004

EquipmentShare

02/2017 - 07/2017

Senior Software Engineer

- Enhanced telematics rule engine with partitioned database architecture, improving data consistency and reducing blast radius for multi-tenant customers
- Integrated multi-vendor tracking APIs (John Deere, Komatsu, Hyundai) providing unified asset visibility across manufacturer platforms

Carfax

03/2011 - 02/2017

Product Developer

- Re-architected consumer business domain using microservices principles, enabling unified experience across web, mobile web, and native applications
- Increased consumer revenue by 15% through PayPal and Amazon Pay integration in purchase flow

Enterprise Holdings

12/2004 - 02/2011

Senior Software Engineer

- Integrated multi-brand reservation system consolidating Alamo, National, and Enterprise web services into unified customer experience
- Developed OpenTravelAlliance-compliant SOAP service exposing reservation functionality to third-party travel sites (Orbitz, Kayak)

MonsterCommerce LLC

06/2004 - 12/2004

Customer Support Specialist

- Provided technical support for e-commerce platform including HTML/JavaScript development and application troubleshooting
